

Residential / Commercial

Interior & Exterior

We are a Santa Fe based company with old fashioned ideals. We enjoy bringing service to our clients. So many times we hear "you showed up"! We bring this professional attitude with us through the entire process.

We offer free estimates. We go to your home or office, measure and look over the area you wish painted. If you are having trouble picking color, we can offer you consultation after discussing the look you are wanting to achieve.

Pricing depends on what you are requesting done and the condition of the space needing to be painted. But a general rule of thumb is \$1.25 a sq foot. Smaller projects, touch ups and things like cabinets are estimated by time and the material costs.

Residential HOA

As a small company we have been beautifully supported through a wonderful network of clients which have become friends. Our clients have brought us to Durango Colorado, both Scottsdale and Phoenix Arizona, and South Carolina where we have completed several exterior and interior jobs. In Scottsdale we have painted at the Princess Views and Desert Highlands HOA's both located on Golf Courses and successfully completed various exterior and interior home projects. We offer a reliable service that reflects value to help you choose the colors that best suit your home within the guidelines of your association.

We operate mostly out of the Santa Fe area where our work is predominantly word of mouth, and through realtors.

Real Estate

Whether you are interested in a new look for your home or getting it ready for sale we are the painters for you. We work with several real estate agents based in Santa Fe that need to find cost effective ways to make the space they are selling appealing and desirable. By repairing cracks, caulking and painting we make the space available for the clients to visualize how it would best suit their needs. Whether it is finish plaster or stucco we match and hide blemishes and small cracks.

Some projects require us to clean and empty the space from prior tenants. Finishing Touch Painting & More has a trailer and the necessary equipment to handle these situations with ease. We power wash stucco to remove stains, repair small cracks, clean out gutters, trim branches and refinish exterior woodwork to make homes look more attractive. After inspections we are able to complete punch lists to accelerate the closing.

Whether painting commercially or residentially the preparation is the most important part. By using quality products without altering their integrity, Finishing Touch can proudly stand by the work. We tarp, scrape, caulk, patch, sand and clean before we open a can of paint. Nothing is perfect, but we strive for perfection.
